

Health and Safety

Our electronic Health and Safety system is a simple, efficient and user-friendly tool designed to cover all Health and Safety auditing requirements within a healthcare environment.

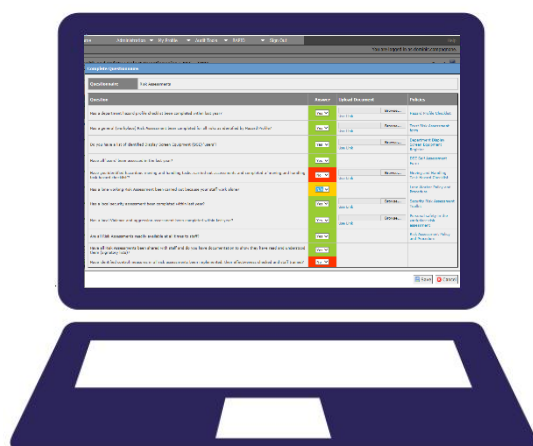

Our Health and Safety system allows you to record the results of all Health and Safety audits in one centralised location, allowing you easy access to your data, and our in-built Action Planning module generates and distributes rectification tasks.

The system also allows for the storage of countless policies, checklists and procedure sheets, ensuring that you and your staff have easy access to information wherever and whenever it is needed.

Features and benefits:

- ✓ Ability to store countless different policy documents, checklists, procedure sheets and forms.
- ✓ All features of the system run through a web browser meaning the system can be easily accessed from anywhere within the network.
- ✓ Easy drop-down answering
- ✓ Complimentary to many Estates & Facilities management systems.
- ✓ Full tablet capability – can be performed anywhere, at any time.
- ✓ Inbuilt action planning, allowing for the easy distribution of essential tasks.
- ✓ Not just auditing for auditing's sake – the system generates a meaningful score for each individual location.
- ✓ Fully customisable multi-dashboard widget screens so that you can see the data that you want to see personally.
- ✓ Pre-built multi-dashboard widget screens displaying an overall ward score and a breakdown of the scores by domain.
